

COVERING MATERIALS

FOR BOOK BINDING AND PACKAGING

WE PRODUCE

PVC COATED MATERIALS FOR BINDING AND PACKAGING

Skinplast produces and commercializes PVC coated on paper or cardboard. Books' cover, diaries, luxury boxes, folders and stationery are the main application.

100% MADE IN ITALY we are partner of the leading companies onto the different markets' segment.

Digital printable papers, metallic effects, NEW glitters series, Iridescent colours and WALLPAPER are the new materials recently introduced.

	260 ± 10	100 cm				
	400 ± 10	from 100 to 110 cm				
DIGITAL WHITE	220 ± 10	from 100 to 135 cm	100 mtl	76 mm	on request	yes
	260 ± 10	100 cm				
	400 ± 10	from 100 to 110 cm				

Available with any type of embossing.

Our collection which represents a vast gamma of articles, is only a minimum indication of what we can achieve, in as much, in reality, we execute in predominance colours and special articles out of normal list; exchanging embossing cylinders and printing cylinders, personalising the production in relation to the customers requirements.

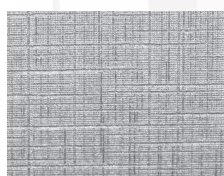

3 With the trade name of DIGITAL PARATI we refer to a new range of wallpapers fully printable by the digital printing technology. The distinctive construction of the material allows to use the more common digital printing systems (solvent, eco solvent, LATEX and UV) to achieve any customized prints.

The DIGITAL PARATI range offers a variety of embossing effects on the surface allowing to enhance the printing result or to emboss the material by using a cylinder achieving a more emphasized effects.

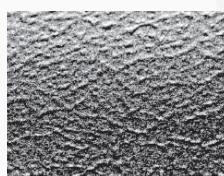

COMPOSITION	MATERIAL THICKNESS	MATERIAL WEIGHT	ALTEZZA STD PRODUTTIVA	LACERATION	HEIGHT ROLL

4 DIGITAL MATERIALS FOR WALL DECORATIONS AND POUROUS HARD SURFACES

It is a film on TNT support printable with digital systems (solvent, ecosolvent, Latex and UV flexible) and with the traditional systems (screen printing and rotogravure).

The print can be transferred using non-washable water paint or special preparations on absorbent surfaces with excellent results in print quality and thickness.

The TNT support is optimized for printing and applying large formats, ensuring easy removal.

Excellent resistance over time, light and humidity

COMPOSITION	MATERIAL THICKNESS	CARRIER
70% PU 30% Polyvinyl Alcohol	60 microns	TNT

ROLL HEIGHT	ASPECT	APPLICATIONS
50 cm - 75 cm 100 cm - 150 cm	Trasparent	Plaster, cement, drywall, natural stone, wood

DIGITAL AFFRESCO

EASY TO USE, SIMPLE APPLICATION, EXCELLENT FINAL RESULT

Particular receptive film on printable and engraved paper with solv/ecosolv plotter.

It allows you to make stencil-like decorations or images of any kind.

Another advantage is the removal of the dry substrate after application with the appropriate primer.

It is advisable to use this material mainly on flat and regular surfaces.

COMPOSITION	MATERIAL THICKNESS	CARRIER
-------------	--------------------	---------

70% PU 30% Polyvinyl Alcohol	60 microns	Paper
------------------------------------	------------	-------

ROLL HEIGHT	ASPECT	APPLICATIONS
-------------	--------	--------------

50 cm - 75 cm 100 cm - 150 cm	Transparent	Plaster, cement, drywall, natural stone, wood
----------------------------------	-------------	---

DIGITAL GRAFFITI
